## Company Information

Thursday, August 07, 2014

### Visit us at Vitafoods Asia

We are very glad to inform you that our company will attend this year's Vitafoods Asia, Hongkong as an exhibitor.

Entering its fourth year, Vitafoods Asia continues to demonstrate itself as Asia's leading event for the nutraceutical, dietary supplements and functional food and drinks industries. On 3<sup>rd</sup> and 4<sup>th</sup> of September Mr. Matthias Tkacz welcomes you on our stand no. 610. In case you are interested in arranging a personal appointment, please click [here](#).

### Hydrolyzed silk protein

The silk cocoons of the mulberry silkworms are the starting material for our Silkhidrolysate Powder.

The so-called natural silk is processed in several production steps to a 100% pure and water-soluble powder. The silk proteins contained therein are similar to the human skin in its structure and therefore very gentle to the skin.

Our Silkhidrolysate Powder is available in different packaging sizes from 1kg foil bags and offers a shelf life of 5 years ([Inquiry](#)).

### Berry- and Fruit Powders

Besides regular productions of various herbal extract powders in the GMP-certified facility of our cooperation partner, also the manufacturing of Berry- and Fruit Powders is part of our range of services for more than 30 years.

In addition of offering our established standard qualities (such as Acerola Fruit Powder), we offer our customers the opportunity to process a variety of fruit juice concentrates to high-quality, vacuum belt-dried powders according to customer's requirements.

In case you are interested to learn more about our possibilities, please contact us any time ([Inquiry](#)).
