Visit our new website.

Following the motto „less is more“, we are glad to present our customers and business partners our new homepage after some months of creative work in the area of web design. After having used the former website for nearly 10 years, the redesign was the logical consequence to grant our customers a better usability and service. We appreciate your visit at www.paninkret.de.

Acerola Fruit Powder - natural Vitamin C

The Acerola Cherry is meant to be one of the richest fruits in Vitamin C worldwide. Cultivated, harvested and selected in South America it finds its way to Germany in form of a high-quality Juice Concentrate which is processed by our long-term production partner on exclusive base into a crystalline Fruit Powder with a characteristic fruity-sour taste by the use of vacuum belt-drying and addition of organic Maltodextrine. This special Fruit Powder contains up to 30 % natural Vitamin C without using any synthetic Ascorbic Acid. The production process (production entirely in Germany in a GMP-certified facility) is subject to a continuous optimization process for more than 30 years to offer our customers the best quality possible.

If you have interest, we would be pleased to present you our qualities containing only [natural Vitamin C](#) or the more cost-effective alternatives containing also added [synthetic Ascorbic Acid](#).
