

# PANINKRET

Chem.-Pharm. Vertriebsgesellschaft mbH

## Company Information

Monday, September 17, 2018

### Meet us at

### Vitafoods Europe

This year Mr Benny Rehders (responsible for animal extracts and hydrolysates) and Mr Sebastian Zakrzewski (responsible for herbal extracts and fruit powders) will travel to Geneva on May, 10<sup>th</sup> for one day. If you are also on site and have interest in a personal appointment, please get in touch with us accordingly ([inquiry](#)).

### Hydrolyzed silk protein

The silk cocoons of the mulberry silkworms are the starting material for our Silkhydrolysate Powder. The so-called natural silk is processed in several production steps to a 100%

pure powder which is characterized by its very good water solubility and its particularly long shelf life. Our Silkhydrolysate

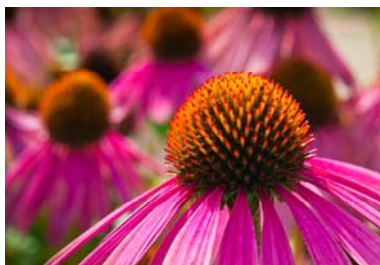

Powder is available in different packaging sizes from 1kg foil bags.

We appreciate your [inquiry](#).

### Echinacea - the purple Coneflower

The raw material used for the production of our Echinacea Freshplant Pressjuice Powder (species *Echinacea purpurea*) is being cultivated for years by our longterm production partners according the guidelines of the European Organic Regulation

834/2007. Immediately after the harvest the fresh plant material is processed into a high-quality freshplant pressjuice which still contains the entire spectrum of ingredients. Afterwards the material is processed into a free-flowing powder (freshplant pressjuice or dried pressjuice) very gently by vacuum belt-drying. [Upon request](#) we offer our standard quality which contains Maltodextrin as carrier substance and some additives. Alternatively we recommend our 100% native product which is produced without any processing aids.

## Imprint
