We appreciate to welcome you at our **stand 8F104!**

Echinacea purpurea Extract Powder

After months of intensive R&D work, we are proud to present two new products of our current range: we talk about a high-quality extract powders made out of the dried, aerial parts of Echinacea purpurea (purple coneflower).

The production takes place entirely in Germany at the facility of our GMP-certified production partner. We are able to offer an organic-certified extract by the use of 10 % carrier substance as well as a native quality, without any processing aids. The products are rich in polyphenols and Cichoric Acid and are very well soluble in water. The applications are versatile. If you are interested in a sample or an offer, please contact us any time ([inquiry](#)).

Ingredients from nature
