WINTER TIME IS CISTUS TIME

Cistus incanus is the most polyphenol-rich edible plant in Europe. Its polyphenol content is even three times higher than that of red wine. Polyphenols are phytochemicals, especially secondary metabolites, known for their potential health benefits. They are sometimes even referred to as the "vitamins of the 21st century". PANINKRET will have an aqueous ethanolic Cistus extract powder with a guaranteed high polyphenol content of at least 35% produced before the end of 2021.

All production steps in the manufacturing chain are subject to analytical controls - from the testing of raw materials for all types of possible contaminants to in-process controls and the final control of the end product, where the polyphenol content is determined. The final material will be additionally certified organic by DE-ÖKO-003.

If you are interested in our Cistus extract powder, please contact us ([inquiry](#)).

THE WAIT IS OVER - SEE YOU IN FRANKFURT?

The safety of all visitors and exhibitors already had absolute priority last year and so the FI & HI Europe planned for 2020 could not take place due to the known circumstances.

Since then, many things have changed, so that it is now finally possible to exhibit again, to be present, to actively exchange with people - and this, of course, in compliance with all applicable hygiene and safety measures.

We are therefore looking forward to welcoming you at our booth 30C181 (Hall 3.0) in the halls of the Frankfurt Messe from November 30 - December 2. Our team this year will consist of Mr. Seifert, Mrs. Reinecke, Mr. Matthias Tkacz, Mrs. Stockfleth, Mr. Rehders and Mr. Zakrzewski, who will be on site on different days.

See you in Frankfurt? Then you are welcome to make an appointment in advance ([appointment request](#)).
